

42 SERIES ELECTRONIC WALL FAN/LIGHT SWITCH MODEL (#42517- 2 POSITION WHITE)

This switch is designed for demanding applications that require operation of both incandescent and motor loads via ONE SWITCH such as with an exhaust fan up to 1/3 hp. and a light or heat lamp up to 500 watts.

The 42 Series turns a fan and light “on” at the same time. When the switch is actuated down to the “timer” position, the light turns “off” and the fan remains “on” for a predetermined period of time up to 60 minutes.

FEATURES

- Rugged construction for residential or commercial use
- Life expectancy of over 50,000 cycles
- Uses standard wall plate - single or multi-ganged (not included)
- One switch controls both fan and light eliminating the need for two individual switches
- Includes all necessary mounting and installation hardware
- Silent operation
- Saves energy by automatically turning fan “off”
- Solid state electronic components for long life
- Two position switch . . . On/Timed Fan
