## **LD** EURO WALL FAN LD150

### Description

Ventilating fan shall be a quiet wall mount type unit. Evaluated by ETL and conforms to both UL and CSA safety standards. Refined flat square front cover will match most interiors. Suitable for operation in ambient temperatures from 40°F to +100°F.

### Housing

Integrated component design allows all parts to be dismantled for cleaning without use of special tools. High quality white ABS material designed for installation into a 6" duct. No additional mounting boxes required just connect to the duct.

### Grille

Sleek unobtrusive design utilising ABS material

### Typical Specifications

Ventilating fan shall be wall mount with no less that 90 CFM and no more than 3.0 sones respectively, as per Home Ventilating Institute (HVI) standards at 0.1" static pressure in inches water guage. The motor shall be permanently lubricated. Power rating shall be 120V/60Hz. Duct diameter shall be no less than 6".

**\*CAUTION:** Do not place in shower or tub where water can reach the fan.
